

REVIX LIGHTING

LIGHTING FOREVER

About Us

Revix Lighting “ Lighting Forever” is an indo German firm. Just over a year ago, we begin our establishment in mumbai.

In a very small time space we grew up many contacts, which helped us to setup ware houses to collect the raw materials coming from different countries. Our main work frame is to work on with each and every profile, so we had to import the full amps divers, high tech LED chips, Cree LED chip and many more raw materials only to make sure we don't compromise on our products, clients and there complex designs.

We import from USA, Germany and Thailand

we get the raw materials from the top most rated countries for there products and we assemble in India and the next level of work is done in our ware house which are in Mumbai, Bangalore, Chennai and Delhi.

With most expressed employees with full on dedication and well maintained ware house, in this field to meetup and finish all kind of needs of our clients

Company Profile :

In light of same, we would like to highlight some following Points:-

- 1.) Set up an Indian manufacturing with imported diffusers of Lighting India as service the lighting requirements in the region, REVIX LIGHTING offers European technology at Indian prices backed by manufacturing in India. Just to reiterate,
- 2.) Lighting systems from REVIX are trendsetting in design, functional, and that are genuinely creative – not just because they're aesthetically appealing or cutting-edge technology, but because with REVIX's comprehensive service package we place every project in its most favourable light.
- 3.) Some of the salient features of REVIX products include:
 - a. European technology and Indian prices, backed by manufacturing in India; prompt deliveries and after sales with local availability of spares.
 - b. Use of high quality PMMA diffusers, which ensures the light output is ergonomic, true colour output, diffusers do not crack / brittle during maintenance, diffusers do not go pale over a period of time and in event of any fire in the ceiling, before the burning plastic part falls on ground, it self-extinguishes.
 - c. Optimum lux levels at lower LPDs with a homogeneous light diffusion.
 - d. Modularity.
 - e. Mounting flexibility.
- 4.) Pioneers in many technologies (Including Patents) such as: HPD(HIGH PERFORMANCE TRANSPARENT DIFFUSER) REVIX facilitates its customers to achieve highest levels of energy efficiency (equal or lower than 0.5Watts / Square Feet)

We hope the above would facilitate in highlighting the benefits of using REVIX products and we remain at your disposal for any further clarifications.
